THE BRIEF, MEASURED AGAINST CHOSN

The brief describes a drop calendar plus a daily newspaper with Morning and Night editions, market watch, predictions and global coverage. CHOSN already has a first version of the calendar and the news feed, so this plan builds on them instead of starting a new app.

WHAT WE ALREADY HAVE

- Releases page: Just landed, Upcoming drops, News
- Drops with date, time, zone, regions, retail price, buy links, raffle info and a confirming source
- Live status flip (Upcoming to Live now) and an auto news post
- Calendar and list views; web push subscriptions by brand or shoe
- Buy now / Wait outlook, price history, wishlist alerts
- Admin guard in the API; a drop scheduler

WHAT IS MISSING

- Admin panel to add, edit and approve releases and articles (today: a file import)
- Articles with categories, tags, authors, images, related shoes
- Editions (Morning / Night) and the scheduler that publishes them
- Reminders 1 day and 15 minutes before a drop
- Filters by release type and collab; follow brands, shoes and collabs
- Market Watch and Predictions as editorial sections
- Celebrity, fashion-week and global coverage (needs a content plan)

DECISIONS NEEDED FROM YOU

- **Resale prices:** we have no resale data source. Proposal: show our own “market price” (lowest across our stores) and label it that way.
- **Buy / Hold / Sell:** a Sell call is financial advice. Proposal: keep Buy now / Wait for shoppers, add “price rising / falling”, and drop Sell.
- **Unconfirmed dates:** allowed only as a labelled “Rumoured” tag, entered by an editor with a source, never used for reminders.
- **Mobile apps:** start as a PWA (installable, web push). Native iOS / Android later, if usage proves it.
- **Editorial content:** who writes or sources celebrity, fashion-week and global stories?

Principle kept from the current site: only confirmed facts, every date and price shows where it came from and when it was last updated, and estimates are labelled as estimates.

ADMIN (staff only)

Releases · Articles · Editions · Approvals

Compare and Community stay in the web header; they are outside this brief.

SCREEN	WHAT IT HOLDS	STATUS	NOTES
Bottom nav	Calendar · News · Saved · Profile	UPGRADE	Today: top nav (Compare, Releases, Community). Add a bottom bar on phones.
Calendar: List / Week / Month	Toggle, filters, release cards	UPGRADE	List and calendar exist; add Week and the toggle. Times shown in the user's zone.
Filters	Brand, price range, release type, region	UPGRADE	Brand and region exist; add price range and type (general, limited, collab).
Release detail	Story, linked articles, market price and history, buy options	UPGRADE	Detail page exists; add story, linked articles and market-price history from our data.
Notify me	1 day and 15 minutes before launch	UPGRADE	Push subscription exists; add timed reminders per drop.
Follow	Shoes, brands, collabs	UPGRADE	Brand and model alerts exist; add collabs and a Saved tab.
News: Edition front page	Morning / Night edition, top stories, sections	NEW	Replaces the flat news list.
Today's Releases	Shoes released today, retail and market price	NEW	From drops plus our price data.
Market Watch	Price rising / falling with %, plain-language reason	NEW	From daily best prices and the Buy now / Wait model.
Predictions	Likely to sell out or hold value, clearly an estimate	LATER	Needs 60 to 90 days of outcome data (the log is already collecting it).
Celebrity · Fashion week · Global	Editorial sections	NEW	Needs a content plan (see decisions).
Article page	Headline, summary, source, time, tags, images, related shoes and drops	UPGRADE	News story page exists; add tags, images and related links.
Saved	Followed shoes, brands, collabs, reminders, wishlist	UPGRADE	Wishlist and alerts exist; unify them under Saved.
Profile & settings	Time zone, notification times, light / dark	UPGRADE	Notification settings exist; add zone and edition push.
Admin panel	Add / edit / approve releases and articles; draft to published	NEW	Largest missing piece. Re-uses the existing admin guard.

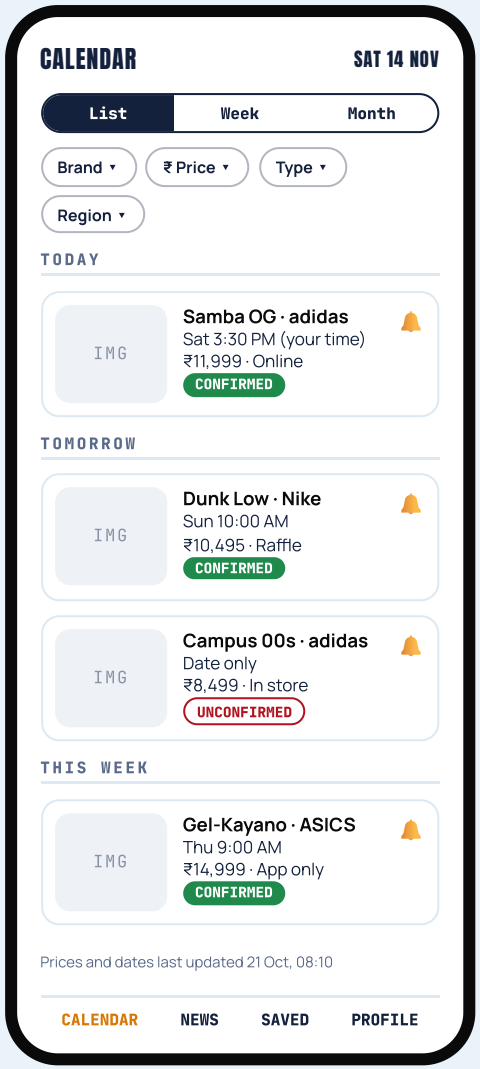

2 · DATA MODEL

TABLES

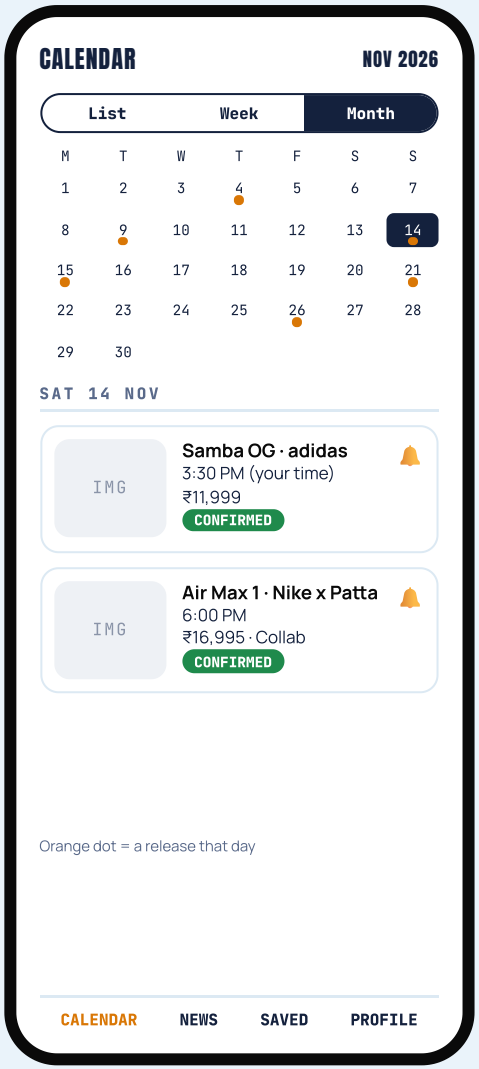

TABLE	FIELDS AND PURPOSE	STATUS
drop_events	sneaker, release_date / time / zone, regions, retail_price, status, purchase_links, raffle_info, source_name / url. ADD: release_at (UTC instant, shown in the user's zone), release_type (general / limited / collab), collab_name, confirmation (confirmed / unconfirmed), where_to_buy kinds (online, in store, raffle, app only), story, images, last_verified_at.	UPGRADE
articles	Grows from news_items. slug, title, summary, body, author or source, source_url, category (top story, celebrity, fashion week, industry, global, market, review), tags, region, hero image, status (draft / in review / approved / published), published_at, created_by, approved_by.	UPGRADE
article_links	article_id → sneaker / drop / brand. Powers "Related shoes and drops" and "Linked articles".	NEW
editions	kind (morning / night), edition_date, status, published_at, push_sent_at. One row per edition.	NEW
edition_items	edition_id, section (top stories, today's releases, market watch, predictions, celebrity, fashion week, global), position, ref_type (article / drop / market_move / prediction), ref_id.	NEW
market_moves	Daily rows per shoe: price change %, direction, short reason, "market price" (lowest across our stores). Built from daily_best_prices and outlook_latest; no resale data source needed.	NEW
predictions	shoe or drop, statement, horizon, basis, estimate flag, resolved outcome. Later, once outcome data exists.	LATER
follows	user or device, kind (shoe / brand / collab), ref. Brand and model subscriptions exist; collabs and a unified Saved list are new.	UPGRADE
reminders	drop_id, user or device, minutes_before (1440 and 15), sent_at. Sent by the scheduler.	NEW
push_subscriptions · notification prefs	Web push subscriptions exist; add time zone and edition notification preference.	UPGRADE
admin_users · audit_log	Roles (editor, approver, admin) and a record of every create, edit and approval.	NEW
price_history · wishlist · watches · outlook_*	Already built and reused for market price, history and Saved.	HAVE

Time handling: every release is stored as one UTC instant plus its origin zone; each user's zone decides how it is shown, and reminders are computed from the instant. Every price and date carries a "last updated" time.

ARTICLE PAGE

STEP BY STEP

	PHASE	ROUGH TIME	WHAT GETS BUILT
1	**Admin panel and article model**	2 to 3 weeks	Staff login; add / edit / approve releases and articles; draft to published; audit log; articles with categories, tags, images and related shoes. Everything after this depends on it.
2	**Calendar upgrade**	1 to 2 weeks	List / week / month toggle, price and type filters, collabs, times in the user's zone, Unconfirmed label, last-updated times.
3	**Reminders and Saved**	1 to 2 weeks	Notify me (1 day and 15 minutes before), follow shoes / brands / collabs, a Saved tab that unifies wishlist and reminders.
4	**Editions and scheduler**	2 weeks	Morning (about 07:30 IST) and Night (about 21:00 IST) editions built automatically from approved articles, today's drops and market moves, then published and pushed. An editor can adjust before it goes out.
5	**Market Watch**	1 to 2 weeks	Daily market moves from our price data: rising / falling with percentage and plain-language reasons, using Buy now / Wait for shoppers. No Sell calls.
6	**Editorial sections**	Ongoing	Celebrity style, fashion week, industry and global coverage. Needs the content plan: original short write-ups that credit and link their sources, never copied text.
7	**Predictions**	After 60 to 90 days of data	Likely to sell out or hold value, clearly labelled as estimates, scored against the outcome log we are already collecting.
8	**App polish**	2 to 3 weeks	Bottom navigation, dark and light mode, installable web app with push. Native iOS and Android only if usage justifies it.

READY TO GO

- Phases 1 to 3 use only what we already have; no outside data source needed.
- Phase 5 needs no resale feed: it uses our own prices.

WAITING ON YOU

- The five decisions on page 1, especially resale prices, Sell calls and who writes editorial content.
- Some confirmed drops with source links, so the calendar is not empty at launch.
